

FEATURES

- Ceiling mount
- Lockable door
- Adjustable/removable cable managers
- Sliding master panel
- Accepts LGX adapter plates
- 3/4" Knock outs on each side (x2)

This FIS Zone Enclosure is a ceiling mounted 2RU, that can hold up to 144 fibers (LC). Fits in 2x2 drop ceilings. This cross-connect is intended to patch and distribute infrastructure cables from one zone to another within a dedicated network.

The enclosure is equipped with a completely detachable master panel capable of accommodating (6) LGX adapter panels. Additionally, it features a back panel with 96 mounting holes arranged in a 16"x6" configuration. These two features allow you to fully customize the internal layout to meet any job requirements.

Each enclosure is supplied with mounting hardware, which includes steel threaded tie wire and anchors.
