

FIS 1RU 4X SLIM HIGH DENSITY ENCLOSURE

FEATURES

- Holds (4) 4X SHD Plates, Modules or Cassettes
- Mounting Ears Feature Integrated Cable Management
- Compatible with Standard 19" Telco Rack
- Manufactured in USA

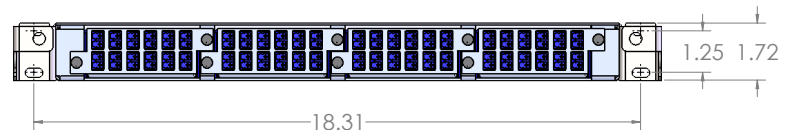

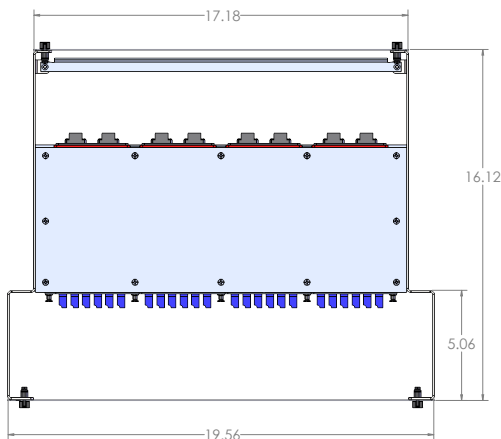

The 1RU 4X Slim High Density Enclosure provides a high density 'plug and play' solution within data center infrastructure. It accommodates (4) 4X SHD Plates, Modules or Cassettes. Use with 4X SHD Breakout Cassettes to create a secure breakout point from multi-fiber MPO trunk cables to duplex LC patch cables. This modular platform provides a convenient, rapid deployment solution when installing MPO trunk cables and breakout positions within a network.

The 1RU enclosure is designed to fit into standard 19" telco racks. Mounting adapter brackets extend out past the front and back of the enclosure to assist with fiber management and routing. Both front and rear doors are easily removable and provide uninhibited access to the fiber connections.
