

FIS COMPACT WALL MOUNT SPACER KIT

FEATURES

- Mounting plate
- Spacer/Patchcord manager
- Can also be used in ISP applications

The FIS Compact Wall Mount Spacer Kit includes a mounting plate and 0.5” spacer for installing FIS 1 and 2 panel compact wall mounts onto OSP cabinet rails or rack panels without compromising the cabinet’s NEMA rating. The spacer offsets the mount to provide rear connector access while doubling as a patch cord manager, neatly managing excess slack for a clean, professional appearance. Suitable for OSP and ISP applications, the kit is constructed from .060” aluminum with an electrostatically applied powder coat finish, available in Black or Off White.

SPECIFICATIONS

Dimensions	8”x10” (mounting plate)
