

FIS AERIAL BUCKET WORK TRAY

Part #: F11TBSC

FEATURES

- 8 Inch of Depth for Storage
- Made With Special Grade Copolymer
- Top Cover Has Straps

**Picture Shown with a FIS Splice Caddy
SOLD SEPARATED
Part#:F1SBS**

This aerial Bucket tray has a depth of 8 inches, housing tools and supplies to prevent them from falling to the ground. It is made of a special grade of copolymer for good, cold weather characteristics. The support brackets are made from high-density copolymer for added strength. The foot of the support bracket can be adjusted for the level of the tool tray using common woodworking tools. It is suggested that adjustments be made in 1/4" or smaller increments. The top cover has a strap to tether to the side of the tray.

SPECIFICATIONS

Dimensions	23"L x 12"D x 9"
Flat Work Surface	23" x 11"
Depth of Tray	8"
