

FEATURES

- Available in 200X or 400X magnification
- Up to 3.5hrs battery life
- 4" LCD w/ brightness & contrast
- Eye safe viewing
- LED illumination
- 2.5mm universal connector adapter

The FIS Portable Video Microscope is the ultimate inspection system for field use. Powered by 8 NiMH rechargeable "AA" batteries, or with provided AC adapter. The newest addition to our microscope line features a 4" diagonal LCD monitor and 200X or 400X magnification, providing high resolution images for most standard connector end faces. Housed in a rugged, weather resistant, water proof case, the unit is built and tested for harsh environments associated with field use.
